Subject: RE: entrance to the Drug Lab

Chuck-

I am referring your inquiry to Dina and Julie, because I have not been involved with the details of the project you describe.

I was told that 3 west hallway access was going to be restricted (with installation of card readers at 3 west elevator lobby doors to hallway and on stairwell 1 door at south end of 3West). My supervisor instructed me to prepare an outline plan for 3 west hallway.

Law enforcement/visitor access, as well as, internal personnel access were included in my outline.

When I inquired, I was told by my supervisor that Julie had made you aware of this project, its details including access procedures, and the reason for implementing it. Since I submitted the outline plan to my supervisor, I haven't been told any further info about the project or its progress.

I apologize for the confusion, but as I've noted, it has little to do with me.

Thanks.....kathy

Subject: entrance to the Drug Lab

Hi Kathy, The workmen are putting a card reader entry system in the stairwell in the back of the Drug Lab. I was told that only Drug Lab personnel will have access to this door reader. If only the Drug Lab staff will have access, then why is this being put in, since nobody else will have access rights in an emergency to enter the floor. This door enters directly into the lab and not into a hallway. The door in place now does not allow entry onto the floor from the stairwell. I can be reached at 6629. Thanks Chuck Salemi
